## PROFILE SUMMARY

I am a committed **Full Stack Software Engineer** with a strong focus on MERN stack technologies and a growing expertise in blockchain development using Solidity. Since beginning my career in 2020, I have developed and deployed a range of web applications including learning management systems, e-commerce platforms, and specialized SaaS products such as quiz and survey tools. A notable project in my portfolio is **Hadi E-learning**, a **E-learning** platform for training students in online technical courses, which I developed using **MERN**. I have also imparted my knowledge to over **450 Students**, emphasizing both foundational skills and cutting-edge technologies like blockchain. My goal is to keep enhancing my skills to create innovative solutions for modern challenges.

## EXPERIENCE

### Hadi E-learning, Full Stack Developer, Feb 2023 - PRESENT

- Developed and deployed Hadi E-learning main web application and its CMS, LMS, with MERN, NextJs (13v) and designed with Bootstrap, Antd and Sass.
- Built and deployed Astra Analytica and its dashboard with MERN and Tailwind Css.
- Developed and deployed LMS with NextJs (12v) and MySql.
- Developed Ticketing System with MERN and designed with Antd.
- Developing SaaS product (Quiz and Survey Maker) with MERN and designed with Bootstrap and Antd.
- Trained 450+ students.

### Cycarts, Junior Full Stack Developer, April 2021 - Jan 2023

- Developed and deployed Ecommerce web application and its dashboard with MERN and designed with Tailwind.
- Built and deployed Cycarts converter tool with NodeJs
- Developed and deployed Taniq web application and its dashboard with MERN and designed with Antd.
- Developed Cycarts main web application with MERN and designed with Bootstrap and Sass.
- Developed Cycarts (version 2) main web application with NextJs and designed with Tailwind.

## SKILLS

### Programming Languages

Javascript, Typescript, Solidity, HTML, CSS, Sass.

### Libraries & Frameworks

ReactJs, NodeJs, NextJs, NestJs  
ExpressJs, Tailwind, Bootstrap, Ant Design, Recharts, Antd Plots.

### Tools & Platforms

MongoDb, MySql, Firebase, Docker, Kubernetes, Git, Github, Vercel, Namecheap, Firebase, Contabo, AWS 3, Cloudinary

## SELECTED PROJECTS

### Hadi E-learning

Hadi E-learning that provides online courses.

### Quiz and Survey Making

SaaS product where users can create Quizzes and Survey.

### Cycarts

Web application for Cycarts

### Astra Analytica

Main website of Astra Analytica based in UAE .

### DNFTP

Social Application for selling and purchasing NFTs.

### LMS

LMS for Hadi E-learning

## **Freelancing, Full Stack Developer,** April 2020 - PRESENT

- Developed and deployed Housers web application with MERN, Socket.io and designed with Tailwind
- Built and deployed Social application with MERN, Socket.io and designed with Bootstrap.
- Developed and deployed CMS with MERN and designed with Antd.
- Developed and deployed Development of Non Fungible Tokens (DNFTP) with MERN, Solidity, Truffle and designed with Tailwind.
- Developed Ecommerce web application with MERN and designed with Bootstrap.
- Currently working on an Advance E-commerce app with NextJs.

## **LANGUAGES**

English, Urdu

## **EDUCATION**

### **University of Engineering and Technology, Lahore, BSCS**

March 2019 - April 2023

**CGPA: 3.34**
